## About me

I have just graduated from my 2-year UX Design course with the highest grade. My work to date has included working with TINE Handel to redesign their ordering website and feel the practical experiences have been valuable and I am confident in my abilities.

I am english and have lived in Norway since 2012. In a relatively short time, I have gained a high competency in UX-design and really enjoy it.

## Study

- UX Design Course completed with grade A result.
- I regularly present ideas and listen to those of others as we work as a team to find the best solutions.
- I believe my best skills are in generating ideas and gathering and analysing information through the emphasise, define and ideate areas of the design thinking process.
- As a team we have used figma to design prototypes for different types of apps and websites. I display a good level of competence in this but I continue to learn the software to more advance levels of design.

## Continuous Studies

- Subscriptions: Medium Daily Digest, Dribbble
- LinkedIn: In Learning, Ted Talks, Figma Tutoials
- Noroff company seminars/talks

## Skills

- All parts of the Design thinking process
- Data analysis and mapping
- User testing
- Ecosystems for several devices
